"script") stored on a distribution server. The JavaScript file, when executed, downloads and implements, through dynamic writing of applet tags, the Transition Sensor applet. This particular applet remains visually transparent to a user who displays, with his(her) browser, the HTML coding for that page. Specifically, when the JavaScript file is downloaded and the script it contains is then executed by the browser, the script dynamically writes a predefined number and combination of applet tags, i.e., which collectively form the Transition Sensor applet, into the retrieved web page content in lieu of the advertising tag. Subsequent execution of these tags, by the client browser, invokes the Transition Sensor applet. As discussed, the advertising tag also, as the other of its components, encapsulates a reference, i.e., a URL to a specific ad management server, typically sited on a third party advertising server, containing specific media, that collectively constitutes web advertisements, and accompanying player files. --.

REMARKS

The above amendment eliminates possible confusion by clarifying the wording of page 27 of the specification, as filed.

Respectfully submitted,

July 10, 2000
